

KAREN A BEAUMONT, DAEP MIAEP, ACII

Applied Equine Podiatrist

ABBY'S Story

Abby – diagnosed with navicular changes, coffin bone arthritis, side bone and a deep digital flexor tendon injury, and after being told Abby would have a degree of lameness and need remedial shoeing, her owner looked for another way forward.

Abby was losing shoes once a week, still lame and not happy. I found Karen after much research into the benefits of going barefoot – and we have not looked back.

We have been barefoot for around 6 years and have worked jointly with Karen throughout the process with so much support and advice.

We hack over every terrain, leaving shod horses behind. Abby is happy, sound and always willing to play, which in turn makes be a very happy owner.

Your **horse**, your **dream**, your **goal**
